 UNESCO Chairholder at University of ORADEA
 Professor **Radu JUGUREANU**,
 eContent Manager of the SIVCO Romania
 Senior Researcher **Kateryna SYNYSYA**,
 International Research and Training Centre for
 Information Technologies and Systems, Ukraine

Since 2005, the purpose of the annual eLearning and Software for Education - eLSE conference has been the same: "to promote eLearning related activities by providing a forum for exchange of ideas, presentation of technical achievements, and discussion of future directions".

In 2009, when eLSE reaches the 5th anniversary, the organizers' aim is to reach a new level of quality for this event. To allow the participants to approach a wide range of topics related to eLearning educational mission the organizers, the Advanced Distributed Learning Department, decided that the central topic of this year's conference

"eLEARNING 2.0 AND INNOVATIVE PRACTICES WITH eLEARNING"

should be divided into three themes as follows:

- eLearning visions and theoretical contributions***
- Software related developments***
- eLearning educational case studies***

It has been proved through more than 500 articles that eLSE is the right place to go if you want to share lessons learned, progress in software development and research results on various eLearning topics such as: build up functional learning management systems, knowledge databases, network based education, computer aided assessment tools and standardized digital content.
